

which artist holds the major contribution of the company sales?

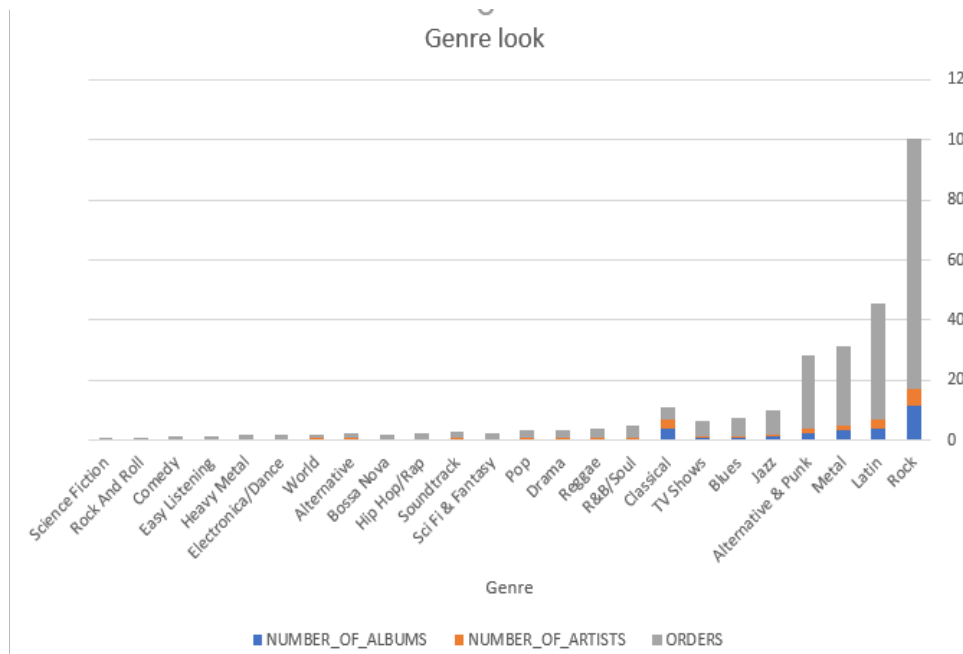

According to our analysis there is a few artists holds the majority of our sales ,

As our top sales came from Iron Maiden ,

With more than 20%

what are the dominating genre?

There is a clear conclusion that the **Rock** music holds the most powerful stand.

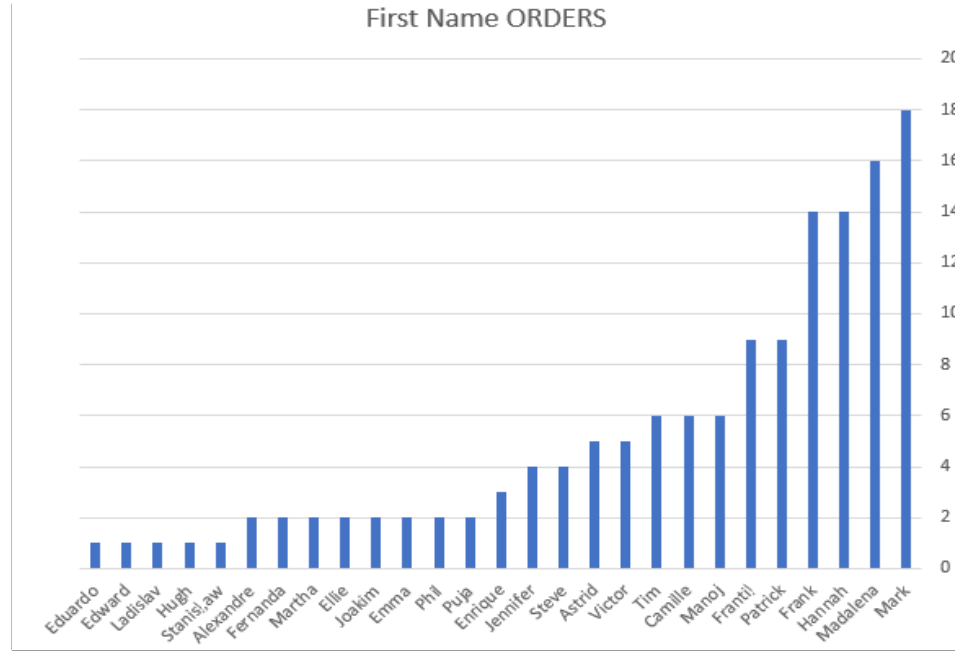

But we had a different deduction here that the more albums and artists the more sales so maybe there is an unused market as may the **blues** and **Latin** have a good market as it has good orders even when it has low albums and artists !!

what are the top artists influence in small market countries ?

If we filtered the top ten ordering countries we will see that the top artists that holds the majority in this countries aren't really doing so well in small market countries and that enforce the conclusion from the previous question .

Is the top popular artist have popularity from so many people ?

As we see our top selling artist is actually has dedicated fans more than dominating the market as we see mark here ordered 18 times for this artist alone and Madalena ordered 16 time and that shows how he is loved from his top fans .
